2015

Introduction

maisam is committed to creating original places, spaces, and experiences which elevate the quality of human living through **knowledge, innovation, and design.**

Introduction

Building on years of Architecture & Engineering experience in the region and internationally, Meisa Batayneh and her team of associates established **maisam architects & engineers** with the vision to utilize knowledge, innovation and design in the pursuit of architectural excellence. maisam's expertise is focused on providing planning, architecture and design services to developers, corporations, governments and individuals.

At the core of the company lies The DesignLab™ staffed by highly motivated and dynamic architects whose ultimate purpose is to produce original products that create optimal value for each client. The DesignLab™ is recognized for its creative edge and innovative design methodology.

With offices in Abu Dhabi, UAE and Amman, Jordan, maisam operates in the Middle East and GCC regions, maisam's multi-disciplinary team comprises architects, engineers, urban planners, project managers, landscape designers, and branding experts.

Introduction

Over the years, maisam's team has been producing diverse landmark projects, ranging from sustainable master-planning for a new city development project in Pakistan that will eventually accommodate two million people to urban solutions that preserve the world heritage site of Petra. Other landmark projects include residential - commercial towers and Palaces in Abu Dhabi, several mixed use projects in the Abdali Urban Regeneration development and the expansion and renovation of one of Santa Fe's oldest residences.

maisam's Portfolio also comprises of diverse prestigious projects, such as: the New Terminal building at Queen Alia International Airport and the Living Wall Mixed Use project, both of which done in collaboration with the world renowned architects Foster and Partners and Phase I development of the Marsa Zayed project in Aqaba which is considered to be the largest real estate development project in Jordan, stretching across 3.2 million square meters.

Introduction

maisam's track record includes several projects which were regionally and internationally recognized, nominated and awarded through numerous and prestigious awards' programs.

The nominations included "Winner of Winners" of the Arch-Triumph competition for the "Museum of Architecture" (MOA), shortlisted for the World Architectural Festival (WAF) Awards in 2009 and 2012. "Maani Residence" was nominated for the prestigious Agha Khan Award in 2004. All of these achievements are aside from winning multiple Arabian Property Awards in 2010, 2011, 2012 and 2013.

In 2014 maisam was awarded the International LEAF Awards in the category of "Urban Design of the Year" for the project "A Gateway to Petra". In 2015, the project was awarded the prestigious International Architizer A+ Popular Choice Award in the category of Master planning, out of thousands of projects that were submitted.

Company Culture

maisam's culture is founded on a spirit of teamwork, partnership and sharing its achievements and successes, all driven by the innate belief in the quest for knowledge and the relentless pursuit of excellence. "Passion, integrity, discipline and respect" are the core values which maisam brings to projects, clients and strategic partners through its collaborations.

Company Structure

In order to respond to the increasingly competitive environment and the need for economic efficiency and organizational responsiveness, maisam has adopted a horizontal organizational structure in the form of a digital chain of intersecting units. Each unit is self-directed and operates on the basis of multi-disciplinary teams working together on “project-by-project” basis to achieve maisam’s strategic goals. The intersection between these units reflects the importance of team synergy and creativity throughout the project cycle. This unique style of project management contributes to maisam’s recognized brand as a firm that is able to deliver high-quality products which serve the intention of the project efficiently and effectively.

When required, maisam draws on a fine group of strategic alliances with international and regional firms and consultants whose expertise includes infrastructure design, leisure management, environment planning, sustainable development etc. . Selecting the right team of specialists to support and nurture each project from conception to implementation guarantees the much needed balance between the technical and the creative.

Services

Master Planning

maisam's involvement in some of the region's major master planning endeavors is a result of methodical expertise in evaluating and devising at both the macro and the micro levels. The strategic alliances that maisam draws on with international experts in every field of planning ensure a high quality product that provides for every aspect of the client's needs and vision. maisam's methodology calls for extensive input from experts in each phase of the project, from the charette stage through to implementation.

Planning

maisam's comprehensive planning services not only assure alignment with government legislation and regulations, but also encompass feasibility analysis, site selection studies, urban planning, suburban planning and development, and site planning. maisam's team of planners & engineers are backed by experts in the fields of economy, sociology, communication, marketing, and branding. maisam's extensive planning service responds to anthropological needs, available resources, municipal and metropolitan limitations, as well as economic viability and feasibility.

Urban design

maisam's urban design approach is sensitive to the human condition and the experience of the natural environment. This approach allows a critical appraisal of the human scale and human needs, based on a collective concern for three-dimensional space as well as for public areas between buildings. maisam's multi-disciplinary design team provides solutions for civic design, landscape design, and infrastructure engineering and architecture. The amenities in design are introduced in layers answering for function, microclimate, materials, services, maintenance and most importantly the users. Projects range in scale from urban nodes to university campuses and city centers.

Exterior & Interior Architecture

maisam is recognized in Jordan and the region for its creative edge that pushes design beyond norms and established perceptions. maisam's clients range from individuals, corporate houses, government bodies, and royal families, many of which are long-standing relationships of trust and mutual respect. The client's direct involvement in the design process allows for a unique interaction with the designers in brainstorming sessions, resulting in at least three design alternatives that capture the vision and needs of each client. maisam's relentless attention to detail coupled with the aim to achieve the highest quality end-product ensures a creative process that benefits the client.

Services

Landscape architecture

maisam's methodology for landscape design is holistic in approach, whereby the landscape design becomes the recipient of input from numerous design tools. The controlling factors vary from landscape visualization to the site's environmental perception, inclusive of public land management processes and most importantly the sustainability of the landscapes thus created. On another level, the landscape design facilitates communication for a working relationship between people and their physical environment. In addition to the conventional tools available, maisam's landscape architects fuse the principals of other social and biological sciences with environmental engineering to deliver a high quality design product.

Engineering & Structural design

maisam's multi-disciplinary engineering team is responsible for the creation of highly functional designs utilizing state of the art technology for cost effective, energy efficient, and reliable engineering systems that provide utmost comfort and sustainability. maisam's engineering team consists of expert structural design engineers with vast experience in projects of complex and large scale programs. maisam's team is equipped with a wide range of expertise that includes the research and analysis of plans and technical proposals, the economical design building materials, special know-how in earthquake-resistant designs, and in developing technical solutions concerning structural and civil designs. The team's high skill level in the application of CAD programs and other computer software in providing engineering solutions ensures deliverables well within projected time schedules.

Construction Supervision

Construction supervision is integral to maisam's promise of quality. On-site supervisors ensure that the highest technical standards of quality and workmanship are observed, where high quality is achieved in alignment with the contract, specifications, and most importantly the original design concept. The supervisor forms a crucial link between the site and the designers providing answers to site queries and architectural details as well as solutions to inevitable new realities arising at site. Each construction site is managed and supervised by an experienced team of architects and engineers who also clarify and advise on matters relating to building construction regulations and contractual issues.

Green Building

Introducing Green

Maisam adopts an aggressive sustainability and green building agenda through the application of environmental, sustainable and green strategies in its projects, and through supporting the efforts of the Jordanian A/E sector in the field of green building, in addition to applying environment friendly strategies within the company itself.

Green Experience

Building on its team Green and LEED experience, maisam's design methodology entails the creation of sustainable and environmental strategies at the early stages of conceptual design. Utilizing both passive and active techniques, these strategies become in many cases the driver of a project's design concept. In its award winning project Crystalle Apartment Building, Maisam has employed various sustainable strategies that warranted the project Jordan's first LEED Gold pre-certification from the USGBC. The competition winner Atrium Building is another Maisam project registered for LEED and is expected to achieve silver level accreditation.

Crystalle Apartment Building, Abdali, Jordan

Awards & Shortlisting

Petra Gate

- Winner of Architizer A+ Popular Choice Award, 2015
- Winner in the Category of Urban Design of the Year, LEAF Award, 2014

Maani Studio

- Shortlisted in the Category of Residential Building of the Year, LEAF Awards, 2014
- Five Stars, Best Single Residence, Jordan, Arabian Property Awards, 2012

College of Art & Design

- Five Stars, Best Public Service Architecture, Jordan, Arabian Property Awards, 2011
- Best Public Service Architecture Arabia, Arabian Property Awards, 2011

Maani Residence

- Five Stars, Best Architecture (single Unit) Arabian Property Awards, 2010

MOA- Museum of Architecture

- Shortlisted in the Winner of Winner stage of ArchTriumph Competition, Museum of Architecture, London, 2013

Carpet Bridge

- Shortlisted in the ArchTriumph Competition, Contemporary Bridge, Category, Paris, 2012

C19 Tower

- Five Stars, Best Architecture Multiple Residences, Abu Dhabi, Arabian Property Awards, 2011
- Best Architecture Multiple Residence, Arabian Property Awards, 2011

Aqaba Bus Terminal & Plaza

- Shortlisted in the Category of Future Competitions, World Architecture Festival Awards, 2009

Ahya'a Amman Boutique Hotel

- First Prize in the Leisure & Tourism Future Category at the prestigious Cityscape Global Awards for Emerging Markets, 2013

Jaffa Gate

- Five Stars, Best Office Architecture, Palestine, Arabian Property Awards, 2012

Zabaneh Residence

- Five Stars, Best Architecture Single Residence Jordan, Arabian Property Awards, 2011
- Best Architecture Single Residence Arabia, Arabian Property Awards, 2011

Crystalle Apartment Building

- Five Stars, Best Apartment Building, Arabian Property Awards, 2010
- Five Stars, Architecture Award, (Mixed Used Project), Arabian Property Awards, 2010

Mansion Gurgooan

- Five Stars, Best Multiple Residence Architecture, India, Arabian Property Awards, 2012

Atrium Office Building

- Highly Commended recognition in the category of Office Architecture, Jordan Arabian Property Awards, 2012

Ahya'a Amman Boutique Hotel

- Five Stars, Best New Small Hotel Construction and Design Jordan, Arabian Property Awards, 2011
- Best New Small Hotel Construction and Design Arabia, Arabian Property Awards, 2011

Crystalle Apartment Building

- Award for Best Future Commercial Project, Cityscape Dubai, 2006
- Award for Top Architecture, CNBC Arabian Property Awards, The Living Wall Project done in collaboration with Foster + Partners

Contemporary Paris Bridge

- Shortlisted in the Arch Triumph Competition, Contemporary Paris Bridge, Paris, 2012

Marsa Zayed

- Five Star, Best Mixed Used Architecture, Jordan, Arabian Property Awards, 2012

East West Tower

- Five Star, Best Mixed Used Architecture - Jordan, Arabian Property Awards, 2012

Petra Gate

- Shortlisted in the Cultural Category, World Architecture Festival Awards, 2011

Commercial Office of the Republic of China (Taiwan)

- Highly Commended Public Service Architecture Jordan, Arabian Property Awards, 2011

Union Banks

- Highly Commended Public Service Interior, Jordan, Arabian Property Awards, 2011

Atrium & Signature Commercial Building

- Architectural Competition Winner in Abdali Urban Regeneration, 2006

College of Art & Design

- Architectural Competition Winner, 2003

- King Abdullah II Center for Excellence, Member
- Design Jordan, Chair
- Jordan National Gallery of Fine Arts, Member
- Climate Change Task Group (FIDIC), Member

Meisa Batayneh Maani is the founder and principal architect at maisam architects and engineers. She is experienced in multiple facets of design including architecture, planning, urban design and corporate and place branding. Over her long and distinguished career, Meisa has led multi-disciplinary teams on large-scale international and regional projects in USA, Pakistan, Cyprus, Saudi Arabia, Egypt, and UAE. She has created regional landmarks and master plans for projects such as the Rift Bay Project at the Dead Sea in Jordan, New Ravi City in Lahore, Pakistan and the Umm Yafenah Islands in Abu Dhabi, UAE. She has also acted as a consultant on projects for members of the Royal Family in Jordan, Saudi Arabia, and UAE.

In addition to Meisa's passion to use creativity, design, and innovation to enhance the built environment; she is actively involved in reform processes through numerous national and international commissions and boards. She is a member of the advisory committee for the Ministry of Environment; that's aims to establish Jordan as the regional hub for pioneering environmental solutions and planning. As a member of the Amman Commission; she is actively involved in the board's two-fold function as an advisory board to the Mayor of Amman and as a design review board. Meisa is also the chairperson of Design Jordan, president of Business & Professional Women of Amman (BPWA), founding member of the architecture and engineering business council and several other prestigious boards and committees.

Hazem Nimri

Group CEO, Senior Partner

LEED AP

B.Sc. Architecture, 1996, University of Jordan

Professional Associations:

- Jordan Engineers Association
- AE Business Council

Boards & Committees:

- Public Sector Communication, AE Business Council
- Engineering Offices Qualification System Upgrade, Ministry of Public Works and Housing
- Green Building Guide, National Building Council

Hazem Nimri is the Group CEO and senior partner at maisam architects & engineers. With his extensive expertise in architecture and engineering, Hazem is an exceptional leader possessing the capacity to carry a project from initiation to final production, all while dedicating time an effort to strategic management, business development and expansion planning. Hazem's ability to cleverly balance between client needs, project deliverables and design quality has earned him a reputation of versatility and objective fairness among his clients and peers. His progression in his career exposed him to numerous disciplines in the industry as well as in strategic management, expansion planning and management operations, while this has led him to a flourishing executive career, nevertheless, Hazem maintains his creative edge and enjoys his involvement in all design stages and disciplines.

As an experienced Architect and Master Planner, Hazem shaped unprecedented solutions for a number of marquee Master Planning projects such as: Umm Yafenah Islands in Abu Dhabi, UAE, the Ravi City Master Plan in Lahore, Pakistan and the Rift Bay Master Plan at the Dead Sea, Jordan, in addition to many other Urban Design and Master Planning driven projects.

Rita Rawashdeh

Creative Director, Senior Partner

B.Sc. Architecture, 1999, Jordan University of Science & Technology

Professional Associations:

- Jordan Engineers Association
- Business & Professional Women
- MELA (Middle East Leadership Academy)

Rita Rawashdeh is maisam's creative director, heading maisam's **designlab™**, she leads a team of architects to achieve exceptional design solutions. Rita's key strength lies in her unique creative flair at achieving unique concepts, quality spaces, contemporary buildings, all forming outstanding architectural designs. Her appreciation of both the outdoor and the indoor coupled with a thorough attention to detail and an innate passion for aesthetics ensures a final product of unparalleled standards.

Rita's unique abilities allow her to work closely with her design team, motivating and challenging them to always bring out the best. Her responsibilities also include following up on the development and construction of projects to insure maximum alignment with the original design concept. She also has a natural artistic flair; she uses a range of techniques to express exceptional Arabian modern architecture. Rita's extraordinary design capabilities have been illustrated in outstanding projects of different types and scales in Jordan, Saudi Arabia, Egypt, UAE, and the USA. Her ability to ensure state of the art visual elements forms the essence of maisam's unique place branding and architecture design expertise.

Dawood Jabaji

Principle Structural Engineer

Ph.D. Structural Engineering, 1974 University of Dundee, UK

BSc. Civil Engineering, 1970, Al Hikma University, Iraq

Professional Associations:

- Jordan Engineers Association
- Associations American Concrete Institute
- The Concrete Institute, U.K.
- Pre-stressed Concrete Institute, U.S.A.
- The Concrete Society, Jordan

Extensive experience in Structural Design as the past head of the Structural Division at Jafar Tukan & Partners.

Major projects include multi-story commercial buildings, five star hotels, hospitals, banks and industrial buildings. Projects in Jordan, United Arab Emirates, Saudi Arabia and Palestine. Author of "Pyramid" – Structural Analysis and Design Software

Building Standards, Specifications and Codes:

Served as director of the drafting team for the General Building Specifications of Jordan and the National Building Codes of Jordan.

Joint author - book on Buildings Codes and Specifications for the ArabWorld. Published by MacMillan, 1983

Building Construction Materials and Technology:

Extensive experience in the fields of building materials, quality control, construction procedures, and construction detailing. Good experience in Construction Contracts and management of the Consultant/Contractor relationship.

Housing:

Served as the head of the team at the Royal Scientific Society which developed a housing construction system

for low income groups. Participated in many local and regional seminars on housing and strategies for sustainable development – often as speaker, once as keynote speaker.

Management:

Served in a dual management/technical role during the period of 1978- 2003. Attended a number of seminars on management and effective management techniques. Served as director of the Building Research Center at the Royal Scientific Society. Served as Administrative Director at Jafar Tukan & Partners in addition to the technical role of chief structural designer.

Real Estate Development:

Assisted in the preparation of feasibility studies for a number of five star hotels and other commercial developments in Amman. Served as manager for the development of a number of master plans for mixed use and housing projects in Aqaba, Amman and Saudi Arabia

Core Team

Ahmad Tayeh

Lead Project Architect,
Associate Partner

B.Sc. Architecture, 2005
Jordan University of science & Technology

Professional Associations:

- Jordan Engineers Association

Ahmad Tayeh a Lead Project Architect and Associate partner in maisam architects & engineers.

As a Lead Project Architect, Ahmad's key strength lies in leading and supervising the project's design team to realize a solid threshold towards the project concepts proposal, developing the approved alternative, and arriving with the project team to the schematic design that meets the client requirements and expectations. During the project's early stage; Ahmad leads and supervises a group of architects in producing the concept design alternatives while accommodating the functional and spatial requirements of the project.

In addition Ahmad follows up on the required supervision office support to ensure compliance with the design.

Ahmad is qualified as a Lead Project Architect with proven capability to meet the client design satisfaction thus was recently appointed as associate partner in maisam.

Um Yafenah Islands Master Plan

Abu Dhabi - UAE

Blending nature, culture and metropolitan life

Um Yafenah is an island community set within mangroves of rare and natural beauty at the heart of Abu Dhabi. A critical approach to urban planning and development was adopted in order to capture an outstanding civic environment that rises above the overflow of development prevalent in the region. The unique aspect of this island development lies in the creation of a new standard in vibrant and contemporary family living that respects local culture and heritage. The project's well-devised feasibility and viability is balanced by providing an exclusive modern living environment that respects the sustainability of the natural habitats.

Emirates Palace Hotel, Aqua Theme Park

Abu Dhabi - UAE

At an exquisite location within the site limits of the Emirates Palace, where the white shores of the Abu Dhabi island meet the deep blue waters of the Arab Gulf, stands the EPH Aqua Theme Park; a pioneering leisure landmark water park that is created with the vision of introducing the EPH area as superior destination in the region hosting visitors from Abu Dhabi, the UAE, the gulf region, and from around the world.

In addition to its daring theme and its state of the art water games and slides, the Aqua Park comprises a serene oasis spa, and landmark sea fountain shooting sea water high up in the skies providing a real landmark in the skyline of the city.

Al Raha village—Marsa Al- Sheikh Zayed Aqaba—Jordan

- Five Stars, Best Mixed Used Architecture Jordan, Arabian Property Awards 2012.

Marsa Zayed is the largest real estate and development project in the history of the Kingdom of Jordan. It is a mixed use development including residential, commercial, recreational and entertainment facilities covering 3.2million sqm and having a total cost of \$10Billion.

The project is located in the Coast City of Aqaba in the southernmost regions of Jordan. Aqaba contains all of Jordans 27km of coast and its only sea port.

Marsa Zayed will occupy what is now Aqaba's seaport which is in the process of relocation freeing 2km of prime waterfront land.

The project aims to become Aqaba's central district and its downtown. It also aims to rival Amman as an option to live and work in. It aims to change Aqaba's stereotype of being a weekend city where Ammanis spend their holidays and return home.

Under the management of Hill International, maisam architects and engineers will be the lead consultant and will carry out all architectural and structural design works. For infrastructure and civil engineering works, Dar Al Omran will be responsible. Universal consultancy services will carry out all electromechanical design works.

Ravi City

Punjab - Pakistan

Building a city of the future

For the first time anywhere in the world, an environmentally friendly city is being conceived to act as an engine of change, by creating opportunities for people from different walks of life, to live, work and thrive together. With an innovative approach to urban planning, to infrastructure and to the use of resources, the city will offer new business opportunities combined with a modern and attractive setting and transform the population's standard of living. This bold and visionary city will be located to the North of Lahore on the banks of the Ravi river and will build on Lahore's historic and cultural heritage as the crossroads between Pakistan and India.

Rift Bay Master Plan

Dead Sea - Jordan

Where nature is the mother of design

This master plan for the Dead Sea area captures the spirit, character and identity of the Jordan Rift Valley, while serving the existing Conference Center and its relation to the surrounding resort facilities. The use of ingenious architectural design solutions enhances the character of the place and its unique environmental features. The concept was created to counter the problem of a disconnect that existed between the two sides of the main thoroughfare and between the existing convention centre and its surroundings. Thus the revival of the rifts leading into the Dead Sea creates a profound statement of sensitivity to the site's heritage and ecology.

Sienna Hills

Ktefeh - Jordan

A Fantasy Engraved in Nature

Timelessly attractive, adaptive and sustainable, 'Sienna Hills' is an innovative and pioneering concept in residential community living; thoughtfully planned down to the smallest detail. 'Sienna Hills' offers its residents the possibility to live in a dream-like village that exclusively and creatively combines nature with luxurious architecture.

'Sienna Hills' embodies the equilibrium between the serenity of nature and the energy of equine and outdoor activity, offering its residents homes designed with an earthy spirit surrounded by expression of style and striking outdoor beauty.

Mirage Residences Development

Um Rumaneh - Jordan

These fifteen hectares of natural spread are composed of a residential development that offers high quality suburban living experience with a strong local relevance. This gated community was developed on the basis of utilizing medium density four story apartment buildings for the benefit of considerable areas of parks and playgrounds. The development is envisaged to be an attraction for young families who aspire to raise their kids in a green, healthy and safe environment with substantial recreational spaces. The architectural image draws inspiration from the context of the site, with its green surroundings and capturing at every angle its multiple picturesque views.

Majestic Village

Na'our - Jordan

A low density residential development of about ninety villas as the project brand indicates, the development will offer each of its' inhabitants a secluded mansion-like living. Each parcel will occupy an acre of land and will enjoy un-interrupted views towards the vast open south west valleys that lead to the Dead Sea. A central park that goes through the development grabs the adjacent forest making it part of the development.

Majestic Village Master Plan

Erbil City Center, Master Plan

Erbil - Iraq

At the heart of Erbil city lies a historic citadel, the proposed commercial urban development is situated in close proximity to this heritage site. The 180'000 m² development was built along a modular design grid that allows for three different functions at three levels; parking space at the basement level, retail shops at the ground floor and offices at the first floor. Two main spines promoted the flow of the users with a unique interactive urban encounter at every turn. High rise towers were introduced at strategic locations of the development without losing the identity of the cultural context.
